

Yousef Yehia Abd Elnaby

Senior Backend Developer

☎ +201123223217 | ✉ yousefyehia159@gmail.com | 🌐 Portfolio

Summary

Backend Developer with solid experience in building and maintaining scalable web applications using **PHP and Laravel**, with additional expertise in **Magento 2** and **WordPress**.

Experienced in developing secure **RESTful APIs**, optimizing database performance, integrating third-party services, and refactoring legacy code to improve efficiency and maintainability.

Strong background in building business platforms across procurement, logistics, healthcare, real estate, e-commerce, sports management, and marketplace systems.

Experienced in Agile environments with a strong focus on **clean architecture, performance optimization, scalable backend systems, and reliable API development**.

Experience

Backend Developer	Myclicx	Feb 2026 - Present
◦ Built Tameer (CAFM System), a digital facilities and maintenance management platform designed to coordinate operations across multiple sites, buildings, assets, and operational teams. ◦ Developed backend workflows for maintenance requests covering issue reporting, technician assignment, execution, review, and final closure. ◦ Implemented preventive maintenance scheduling and corrective maintenance work orders to support day-to-day facility operations. ◦ Developed modules for service level tracking (SLA), incident documentation, and work permit management. ◦ Built asset, location, building, and team management workflows to centralize facility and maintenance operations. ◦ Developed reporting and performance dashboards providing management with visibility into asset condition, maintenance progress, SLA performance, and team productivity. ◦ Designed scalable backend services and business logic using Laravel to support complex maintenance and facilities-management workflows.		
Backend Developer	RFID Saudi Trading	Dec 2024 - Feb 2026
◦ Built a Laravel procurement management platform covering purchase requests, RFQs, purchase orders, suppliers, clients, delivery, invoicing, payments, and operational and financial reporting. ◦ Developed a Laravel property management platform to manage real-estate records, multi-owner structures, and legal documentation. ◦ Developed RESTful APIs for the CarLog mobile application to manage company vehicles and equipment, including user tracking, odometer monitoring, usage logging, and inspection checklists. ◦ Developed RESTful APIs for a 3PL warehouse and logistics management system supporting RFID-based warehouse operations, scheduling, user management, reporting, and inbound/outbound logistics. ◦ Built a Laravel platform combining a public marketing website with a product catalog. ◦ Developed Python automation scripts to reduce manual workload and improve operational efficiency.		
Full Stack Web Developer	Triple Agency	Jun 2023 - Dec 2024
◦ Built a Laravel-based clinic operations platform supporting multi-branch scheduling, reservations, patient intake, billing, revenue reporting, expense tracking, and referral analytics. ◦ Developed a healthcare management platform with admin and clinic dashboards for managing enterprises, clinical staff, patients, appointments, and billing workflows. ◦ Built and maintained multiple WordPress websites with customized themes, plugins, and third-party integrations. ◦ Developed a Laravel-based venue and dining platform with role-based administration for managing reservations, orders, users, and content.		

- Implemented secure RESTful APIs using **Laravel Sanctum and JWT authentication**.
- Developed RESTful APIs for a real-estate platform covering property listings, projects, units, search, filters, developers, districts, OTP authentication, favorites, referrals, wallets, transactions, withdrawals, and provider workflows.

Backend Developer

Medicamall

Jul 2022 - Jun 2023

- Developed and customized an e-commerce platform using **Magento 2** for an online medical store.
- Handled Magento theme customization, product management, integrations, and performance optimization.
- Developed and customized an additional Magento 2 e-commerce platform for surgical instruments and medical supplies.

Full Stack Web Developer — Freelancer

Feb 2021 - Present

- Built a Laravel **multi-vendor marketplace** for on-demand ordering and delivery.
- Implemented vendor and admin workflows including catalog management, POS, orders, delivery zones, delivery staff, wallets, and marketing campaigns.
- Developed Passport-based APIs and integrated multiple payment gateways, Firebase, Twilio SMS, and real-time technologies including Reverb and Pusher.
- Built a Laravel multi-branch platform for freelancers and clients covering orders, transfers, CRM lead sources, referrals, commissions, revenue, dues, and profit dashboards.
- Developed a Laravel sports management system covering memberships, payments, facilities, attendance, permissions, and real-time device integrations.
- Built a Laravel platform and RESTful APIs for **Umrah and Hajj booking**, including packages, reservations, confirmations, invoices, accommodations, transportation, meals, agents, and commissions.
- Developed **Eyadty**, a modular Laravel healthcare platform for managing clinic and dental practice operations.

Projects

-
- **Tameer (CAFM)** — Facilities & maintenance platform: work orders, preventive/corrective maintenance, SLA, assets, and reporting.
 - **Procurement System** — End-to-end procurement: purchase requests, RFQs, POs, suppliers, invoicing, payments, and financial reporting.
 - **ERP** — Enterprise ERP covering accounting, sales, inventory, HR, CRM, and project management.
 - **Elsawady ERP** — Multi-tenant agribusiness ERP for production, inventory, sales, procurement, finance, HR, and e-commerce.
 - **School Management System** — School management platform unifying academic, financial, and operational workflows for admins, teachers, students, and parents.
 - **Akam (3PL / Warehouse)** — Warehouse booking, truck scheduling, RFID asset tracking, and inbound/outbound logistics APIs.
 - **EstateFlow** — Property & asset management for properties, owners, tenants, contracts, payments, and documents.
 - **Property System** — Real-estate platform for projects, units, search/filters, OTP auth, favorites, referrals, and wallets.
 - **Misr Modern Clinics** — Multi-branch clinic system for patients, appointments, billing, inventory, and finance.
 - **Asteshary** — Healthcare admin platform for clinics, doctors, patients, appointments, billing, and mobile APIs.
 - **SportHub** — Sports club system for memberships, payments, facilities, attendance, and real-time device integration.
 - **Nusk Al-Umrah** — Umrah & Hajj booking platform: packages, reservations, invoicing, lodging, transport, agents, and commissions.
 - **EasyList** — Operations platform for freelancers, clients, orders, CRM, commissions, and franchise/financial dashboards.

- **Food Ordering & Delivery** — Multi-vendor marketplace with catalog, POS, orders, delivery zones, wallets, and payment gateways.
- **Multi-Vendor Salon Platform** — Beauty marketplace for salon booking, products, appointments, and vendor management.
- **Accounting, Sales & Inventory** — Sales, purchases, POS, inventory, customers/suppliers, and operational reporting.
- **Ecommerce Platform** — Multi-store e-commerce for products, orders, and sellers (AR/EN).
- **Dababi** — Motorcycle marketplace for bikes, spare parts, accessories, and related services.
- **Online Learning Platform** — E-learning system for courses, quizzes, certificates, instructors, and payments.

Skills

Back-End: PHP, Laravel

API Development: RESTful APIs, Laravel Sanctum, Laravel Passport, JWT

Database: MySQL

Version Control: Git

E-Commerce & CMS: Magento 2, WordPress

Integrations: Payment Gateways, Firebase, Twilio SMS, Reverb, Pusher

DevOps & Deployment: Docker, Server Management

Additional: Python Automation, Front-End Development, Server Management, API Integration

Tools & Practices: Agile Methodologies, Clean Architecture, Clean Code, Performance Optimization

Education

Bachelor's Degree in Computer Science

6th of October University

2022
